Think You Can't Control Your Cool? Think Again. LG SmartThinQ® technology lets you control your LG air conditioner from anywhere, so you can start or stop cooling, change the mode or set the temperature from anywhere. There is no way to determine how long you can run the LG 10,000 BTU Portable Air Conditioner with remote, Model # LP1013WNR, before you have to worry about emptying the water collection tank. Original review: Aug. 20, 2018. I bought a very high end portable LG air conditioner and it has leaked inside the unit since the first day I bought it. Say you need just a little extra cooling, but you want a window unit that really works. Maybe one with 5,000 BTUs, dual cooling speeds and a 2-way air direction function that cools up to 150 sq. ft.
